Art Unit: 1621

The following is an examiner's statement of reasons for allowance:

The declaration filed under rule 1.312 on February 24, 2006 has overcome the rejection of claims 1-19 under 35 U.S.C. 103(a) as being unpatentable over Franz et al (USPN 5,969,199). The productivity output of HFC-125 in Franz is 40 mmol per hour and per liter of reaction medium. By using a high temperature, the applicant was surprisingly able to achieve output of HFC-125 is 180 to 1,700 mmol per hour per liter of reaction medium. These results are clearly unexpected and superior.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jafar Parsa whose telephone number is (571)272-0643. The examiner can normally be reached on 8 a.m.-4:30 p.m. (M-F).
